

POLYWOOD®

Sustainability At POLYWOOD

Meaningful Change Starts In Our Own Backyard

Jessica Salisbury

VP of Specialty Retail, POLYWOOD

Experience

27 years of experience in retail & outdoor living

Sustainability shapes both what we create and the impact we want to have.

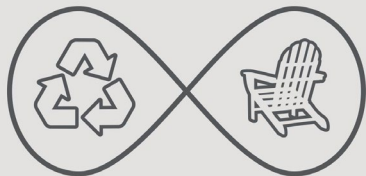

Built Into Our Core

Sustainability is not an added feature at POLYWOOD—it is built into our materials, our manufacturing, our partnerships, and our purpose.

We believe meaningful change starts in our own backyard, and we have an opportunity to create products and experiences that are better for people, communities, and future generations.

Our Sustainability Pillars

FOREVER
MATERIALS

FOREVER
FURNITURE

Forever Furniture

Every collection reflects our commitment to durable designs, premium materials, and styles that stand the test of trends and time.

Consciously Crafted

Our infinitely recyclable lumber is made from reusable plastics in a circular, 99% waste-free process.

Made In The USA

We keep manufacturing close to home to support local jobs, ensure superior quality, and minimize environmental impact.

CONSCIOUSLY CRAFTED

POLYWOOD Recycling Center

We take great strides to divert plastics from landfills and oceans, giving reusable materials another chance to shine.

- **Millions of Containers** Recycled annually in our advanced, eco-friendly circular facilities.

- **99% Production Scrap** Along with furniture returns, scrap is entirely reprocessed back into premium lumber.

Our Production Process

1. PLASTIC CONTAINERS

We receive large bales of landfill- and ocean-bound plastics at our recycling plant, which we shred, wash, and finely grind into 1/2" flakes.

2. SORTED PLASTIC

The clean flakes are sorted to remove all non-plastic material as well as any pigmented plastics we don't want in the final product.

3. RECYCLED PELLETS

Once sorted, the flakes are pelletized, resulting in a material that's (almost) ready to be made into Genuine POLYWOOD™ lumber.

4. COLORANTS

6

But first, we add colorants along with UV inhibitors and stabilizers to ensure beautiful, long-lasting hues.

5. EXTRUDED LUMBER

The pigmented pellets are heated, molded, and extruded to the size and shape of the lumber we need.

6. FINISHED PRODUCT

The furniture is built, shipped, and delivered for our customers to enjoy!

Stewardship & Forestry

Protecting Our National Forests

POLYWOOD's mission of stewardship is at the heart of everything we do. We're proud to work with the National Forest Foundation to support critical reforestation efforts.

1 Tree Planted

For every team member at POLYWOOD

Just as you grow with us, so does your tree, fostering a healthier planet for future generations.

Sustainability Heroes

From Little Things, Big Things Grow

Ryan Hickman, the founder of Ryan's Recycling, is on a mission to make the world a better place—one bottle at a time.

1.7 Million+

Cans & Bottles Recycled

Preventing more than 170,000 pounds of containers from ending up in our oceans, while raising thousands of dollars for the Pacific Marine Mammal Center.

Official Buddy Bench Partner

Sammie's Buddy Bench Project

POLYWOOD is proud to be the official bench partner for Sammie's Buddy Bench Project, inspiring younger generations to recycle in a fun, interactive way while forming friendships.

Recycle & Reward

When they recycle, their school or group can receive their own Buddy Bench to help foster connection and play.

SUSTAINABILITY HEROES
Changemakers On a Mission

Meet the community heroes sharing our vision of a better, more beautiful Earth.

Sustainability Heroes

The Future is Bright

POLYWOOD's mission is to create something meaningful for future generations.

These kids are our future, and they're doing meaningful things now.

We Believe in Second Chances

...and that high-quality materials shouldn't go to waste

The Finished Design

Beautifully transformed into infinitely recyclable, premium outdoor furniture.
